Assessment of the Relationship Between Biological Conditions and
Abstract: Landuse Patterns Using Landsat Data

In 1986, Save Our Streams, with support from local and state resource agencies, embarked upon restoration of the Gwynns Falls, Maryland watershed, a system which ranges in quality from reaches supportive of trout reproduction to reaches severely impacted by urbanization. Because improvements in biological resources are a focal point of the restoration, identification of factors which most greatly impact biota would aid both in restoration and protection of the watershed. This study examined the importance of one such potential factor, hydrologic conditions, to stream communities in the watershed. Fishery and benthic macroinvertebrate data were statistically compared with percentages of impervious surface area and other landuse classifications derived from a Landsat-derived Normalized Difference Vegetation Index (NDVI) for the drainage above each sampling station. A significant correlation between fishery data and proportion of several landuse types was observed, indicating that both runoff patterns and nonpoint source pollutants are important factors in shaping stream fish community structure. Correlations between benthic BI scores and landuse were not significant. However, when fish IBI and benthic BI values were combined into a single index, correlations with landuse improved over use of fish IBI alone, suggesting that use of both groups could improve assessment accuracy.

SECOND AND FINAL CALL FOR PAPERS!

ANNUAL MEETING - FEBRUARY 2, 1992

AUTHOR: **BRETT, Betty Lou**, Nazareth College of Rochester

TITLE: **Low Genetic Variability in Great Lakes Species of Fish**

ABSTRACT:

Evidence suggests that fish which inhabit previously glaciated areas have extremely low levels of genetic variability. Populations of *Etheostoma*, *Rhinichthys*, *Micropterus* and *Stizostedion* from the Great Lakes are compared with fish from non-glaciated areas. The neutral theory predicts that random mutations with no selective effect can be incorporated into the genome, however, northern populations of vertebrates have undergone 3-6 thousand generations without incorporating significant genetic changes into the genome. These low levels can in part be explained by low numbers of founders after the glacial retreat and possibly by stabilizing selection. However, the low levels of heterozygosity, that are found in the Great Lakes drainages cannot be explained within the context of the neutral theory. Other studies show that heavy metals present in streams also reduce the genetic variability of the fish populations. The implications of low heterozygosity to fisheries management is profound as populations with little or no genetic variation may be more susceptible to disease or extinction from pond culture, environmental changes or pollution.

SECOND AND FINAL CALL FOR PAPERS!

ANNUAL MEETING - FEBRUARY 2, 1992

AUTHOR: James P. Kurtenbach

TITLE: An Evaluation of the Index of Biological Integrity for
Application in Northern New Jersey Streams

ABSTRACT: An index of biological integrity (IBI) which utilizes fish communities to assess water quality was evaluated for application in northern New Jersey streams. Because the IBI was originally developed for small midwestern streams, regional modification was necessary to reflect the regions fish fauna. The IBI was applied to a set of approximately 70 sites collected from over a two year period. The modified IBI uses the following ten biometrics: 1) total number of fish species, 2) number and identity of benthic insectivorous species, 3) number and identity of trout or sunfish species, 4) number and identity of intolerant species, 5) proportion of individuals as white suckers, 6) proportion of individuals as omnivores, 7) proportion of individuals as insectivorous cyprinids, 8) proportion of individuals as trout and/or piscivores, 9) proportion of individuals with disease or anomalies and 10) number of individuals in the sample. Quantitative scoring criteria were developed for each biometric based upon the degree of deviation; 5(none to slight), 3(moderately) and 1(significantly) from appropriate ecoregional reference sites. Scores for the individual biometrics for each site are summed to produce a total score which is

TITLE:

ENERGETICS OF LARVAL RAINBOW SMELT.

ABSTRACT:

Rainbow smelt (*Osmerus mordax*) is the only species of fish in the Laurentian Great Lakes that is presently a dominant component of the fish community in all five lakes. In the Great Lakes, they have shown wide oscillations in abundance that may be related in part to variation in survival/recruitment of early life history stages. Routine metabolism, a critical component of an energy budget, was estimated for the average individual rainbow smelt larvae from measurements of oxygen consumption in closed respirometry chambers. We conducted experiments at 8, 12, and 16°C representing the range of temperatures normally experienced by larval smelt in the Great Lakes. The values for larval smelt metabolism were 21.8, 36.1, and 49.5 cal·g wet weight⁻¹·d⁻¹ at 8, 12, and 16°C, respectively. Average metabolism of first-feeding larvae is much lower than would be predicted from back-projection of the metabolism-weight relationship for adult smelt. We use these metabolic observations together with other available information to analyze larval smelt energetics, providing an improved, quantitative perspective on mechanisms possibly influencing population dynamics of these fishes.

SECOND AND FINAL CALL FOR PAPERS!

ANNUAL MEETING - FEBRUARY 2, 1992

AUTHOR: Gary N. Neuderfer, Diana L. Heitzman and Robert W. Bauer

TITLE: Chlorine Toxicity: Past, Present and Future

ABSTRACT:

Chlorine is frequently used to disinfect potable water and wastewater, control biofouling in cooling water systems, and in industrial manufacturing. In New York State, the largest threat of chlorine toxicity to aquatic life comes from wastewater disinfection. It has been well demonstrated that total residual chlorine in these disinfected effluents can be very toxic to aquatic life.

In 1988 the NYSDEC initiated a two-pronged approach to eliminate chlorine toxicity to aquatic life. The first was to develop and implement an ambient water quality standard (AWQS) to regulate chlorine-containing discharges. Effective September 1, 1991, the chlorine AWQS is included in 6NYCRR PARTS 700-705. The second was to initiate a cooperative study by the Divisions of Water and Fish and Wildlife to measure the impact of chlorine-disinfected wastewater on freshwater aquatic life and predict the environmental fate of chlorine. These two approaches would then be used to identify where chlorine toxicity would be expected and eliminate it.

This paper will overview the design and results of the chlorine study. It will discuss how the AWQS and chlorine study results were integrated into a NYSDEC Policy and Procedure that will ensure that chlorine-containing discharges will not result in toxicity to aquatic life in New York State.

CALL FOR PAPERS

ANNUAL MEETING - FEBRUARY 2, 1992

AUTHOR: Robert E. Schmidt and Nick Hankin

TITLE: Has the Expansion of Water-chestnut in the Hudson River Affected Fish Populations?

ABSTRACT:

Quantitative sampling with a pop net in water celery (Vallisneria americana) and water-chestnut (Trapa natans) beds in the tidal Hudson River showed that fish species composition was very different in the two plants. The fish community in Vallisneria is dominated by tessellated darters and spottail shiners while fourspine sticklebacks and young of the year carp predominate in Trapa beds.

Standing crop (g wet weight/m²) of fishes was not significantly different between the two plant species or between years within the Trapa beds. Standing crop values ranged from 0.3-7.1 g wet weight/m² in Vallisneria and 0.6-10.4 g wet weight/m² in Trapa beds.

The differences in species composition may signal significant changes that the expansion of Trapa has caused in the Hudson River fish community. An increase in carp abundance and a decrease in tessellated darters and spottail shiners should be searched for in other data sets to test this hypothesis.

Analyses of Long-term Contaminant-related Stress in Fish Populations.

Pradeep S. Hirethota and Neil H. Ringler
SUNY - College of Environmental Science & Forestry,
Syracuse, New York. 13210

John T. Hickey
U. S. Fish & Wildlife Service, Cortland, New York, 13045

Age distribution, growth history, and the occurrence of gross external lesions of brown bullhead (*Ameiurus nebulosus*) were examined to determine long-term impacts of contaminants (1987). Bullheads were collected using a boat electroshocker from nine highly polluted sites in New York and a reference site in Ontario, Canada in the Niagara River System. Fish were aged based on annual marks on pectoral spine sections, and growth history was back-calculated.

Age distribution patterns indicated a lower proportion of older fish in the polluted site (Love Canal) compared with the control site (Black Creek), suggesting much higher mortality of fish at the polluted sites. Histopathological studies indicated that bullhead of Age 4 and older from the polluted site had a significantly higher incidence of parasitic and non-parasitic lesions. Mean back-calculated lengths did not differ significantly between Love Canal and the Black Creek populations. Back-calculated lengths of bullheads from another polluted site (Buffalo River) were significantly greater than those from the reference site. Bullheads in the polluted site had higher values of condition factor (KTL).

Over 45% of the bullheads from the Love Canal site had melanotic spots of varying magnitude, compared to 9% at the reference site. A shortened barbel condition occurred at a rate of 31% in the Love Canal site, 27% in Buffalo River, and 15% in the reference site. Skin and mouth ulcerations were prevalent in more than 20% of bullheads from Buffalo River. The prevalence of these external lesions was examined in relation to age, sex, season, and size characteristics. Information thus generated will be integrated to develop bullhead populations as an ecosystem health indicator.

Conference Theme: Impacts of Aquaculture on Fisheries and Fisheries Policy

Thursday, 30 January

- 7:00-9:00 p.m. Registration (Motel Lobby)
- 7:00-9:00 p.m. Executive Committee Meeting (Admiral Clark Room)
- 9:00-11:00 p.m. Reception for Invited Speakers (To Be Announced)

Friday, 31 January

- ? -8:00 a.m. Breakfast (on your own)
- 8:00-9:00 a.m. Registration (Motel Lobby)
- 9:00 a.m. Welcome by NYAFS President Field,
Announcements by Program Committee Chair Gordon
(Williamsburg Room)
- 9:05 a.m. Nickum's Law of Ecological Responsibility:
Who Do You Blame?
John Nickum, National Aquaculture Coordinator,
USF&W Service
- SESSION ONE: Impacts of Aquaculture on Commercial and Recreational Fisheries
9:35-10:55 Moderator: ?
- 9:40 a.m. Economic Impacts of Trout and Salmon Aquaculture
Dr. James Anderson, University of Rhode Island
- 10:00 a.m. Costs and Benefits of Stocking (Aquaculture) as They
Relate to the Development and Maintenance of New York
State's Great Lakes Salmonid Fisheries
William Culligan, NYS Dept. of Environmental Conservation
- 10:20 a.m. Response of Wild Trout Populations to Not Stocking
Dr. Robert Backman, Maryland Dept. of Natural Resources
- 10:40 a.m. Panel Discussion
- 10:55-11:10 a.m. Break

SESSION TWO: Aquaculture in Wilderness Areas Moderator: ?
11:10-12:30 Each speaker will address the role of aquaculture in wilderness areas

11:15 a.m. Daniel Josephson, Cornell University Adirondack Fishery Research Program

11:35 a.m. Leo Demong, NYS Dept. of Environmental Conservation

11:55 a.m. Michael DiNunzio, The Adirondack Council

12:15 p.m. Panel Discussion

12:30-1:40 p.m. LUNCH (Owego Room)

1:40 p.m. Reconvene (Williamsburg Room)

SESSION THREE: Impacts of Genetically Engineered and Aquaculturely Cultured Stocks on Fisheries
1:40-3:00 Moderator: Dr. Joseph Buttner

1:45 p.m. Public Policy Issues Posed by Genetically Engineered Fishes
Dr. Eric Hallerman, Virginia Polytechnic Institute

2:05 p.m. New Varieties of Salmonids by Genomic Manipulation
Dr. Bernie May, Cornell University

2:25 p.m. Quantitative Genetic Impacts of Aquaculture on Wild Stocks of Atlantic Salmon
Dr. John Baily, Atlantic Salmon Federation

2:45 p.m. Panel Discussion

3:00 p.m. Break, View Posters

3:30-5:00 p.m. Chapter Business Meeting (Owego Room)

5:00-6:00 p.m. Social Hour, Poster Viewing

6:00-7:30 p.m. Dinner Buffet and Raffle (Williamsburg Room)

Saturday, 1 February

^{0830hrs}
~~9:00~~-11:45 a.m. Contributed Paper Session (Williamsburg Room)

11:45 a.m. Closing Ceremonies by 1992 NYAFS
President, Neil Ringler (Williamsburg Room)

NEW YORK CHAPTER — AMERICAN FISHERIES SOCIETY

TO: Program Committee
FROM: William H. Gordon
SUBJECT: 1992 Annual Meeting (Distribution List Attached)
DATE: December 16, 1991

By now you have received a meeting announcement and the list of invited speakers for the upcoming 1992 meeting. In order to work out any last minute details, I have scheduled a program committee meeting. The place: Owego Treadway Inn. The date & time: Monday, January 6, 1992, 11:00 AM.

A tentative agenda is attached. Feel free to add items as you see appropriate.

I realize this meeting will require extra "road time" for many of you, but your attendance would be most appreciated.

Thanks to all of you for your help so far.

Sincerely yours,

William H. Gordon
Program Committee Chairman

NEW YORK CHAPTER AMERICAN FISHERIES SOCIETY
INVITED SPEAKER SESSION
FRIDAY, JANUARY 31, 1992
TREADWAY INN, OWEGO, NEW YORK

THEME: Impacts of Aquaculture on Fisheries and Fisheries Policy.

KEYNOTE: John Nickum , US F&W Service

SESSION ONE - Impacts of aquaculture on commercial and recreational fisheries.

Dr. James Anderson, University of Rhode Island. Economic impacts of trout and salmon aquaculture.

William Culligan, NYS Dept. of Environmental Conservation. Costs and benefits of stocking (aquaculture) as they relate to the development and maintenance of New York State's Great Lakes salmonid fisheries.

Dr. Robert Backman, Maryland Dept. of Natural Resources. Response of wild trout populations to not stocking.

SESSION TWO - Aquaculture in wilderness areas.

Dr. Daniel Josephson, Cornell University Adirondack Fishery Research Program.

Leo Demong, NYS Dept of Environmental Conservation.

Michael DiNunzio, The Adirondack Council.

Each speaker will address the role of aquaculture in wilderness areas, exploring the answers to the following questions:

In wilderness areas, is fishery management appropriate? What are the roles of stocking and pond reclamation as fish management tools? Are fish species strain considerations important in the management of wilderness area waters? Should re-established populations be managed for one species, or for a community of species? How important are current management practices in maintaining the expectations of wilderness users?

AFS Invited Speaker Session - page 2

SESSION THREE - Impacts of genetically engineered and
aquaculturely cultured stocks on fisheries:

Dr. Eric Hallerman, Virginia Polytechnic Institute. Social
and political implications of genetic manipulations in
fishery science.

Dr. Bernie May, Cornell University. Genetic manipulations in
trout.

Dr. John Bailly, Atlantic Salmon Federation. Quantitative
genetic impacts of aquaculture on wild stocks of Atlantic
salmon.

The 1992 Annual Meeting of the New York State

AMERICAN FISHERIES SOCIETY

INVITED SPEAKER SESSION, FRIDAY, JANUARY 31, 1992
TREADWAY INN, OWEGO, NEW YORK

THEME: Impacts of Aquaculture on Fisheries and Fisheries Policy.

KEYNOTE: John Nickum, National Aquaculture Coordinator, US
F&W Service. Nickum's Law of Ecological
Responsibility: Who do you blame ?

SESSION ONE - Impacts of aquaculture on commercial and recreational fisheries.

Dr. James Anderson, University of Rhode Island. Economic
impacts of trout and salmon aquaculture.

William Culligan, NYS Dept. of Environmental Conservation.
Costs and benefits of stocking (aquaculture) as they relate
to the development and maintenance of New York State's Great
Lakes salmonid fisheries.

Dr. Robert Backman, Maryland Dept. of Natural Resources.
Response of wild trout populations to not stocking.

SESSION TWO - Aquaculture in wilderness areas.

Daniel Josephson, Cornell University Adirondack Fishery
Research Program.

Leo Demong, NYS Dept of Environmental Conservation.

Michael DiNunzio, The Adirondack Council.

Each speaker will address the role of aquaculture in
wilderness areas, exploring the answers to the following
questions:

In wilderness areas, is fishery management appropriate? What
are the roles of stocking and pond reclamation as fish
management tools? Are fish species strain considerations
important in the management of wilderness area waters?
Should re-established populations be managed for one species,
or for a community of species? How important are current
management practices in maintaining the expectations of
wilderness users?

NEW YORK CHAPTER AMERICAN FISHERIES SOCIETY
ANNUAL MEETING JANUARY 30 - FEBRUARY 1, 1992

ACCOMMODATIONS

Reservations must be made by January 17, 1991.
Room reservations should be made directly at the OWEGO
TREADWAY INN by contacting the front desk either by phone:
(607) 687-4500 or 754-4000, or by mailing this form to:

Treadway Inn, Upper 5th Ave., RD #1, Box 43, Owego, NY 13827

Cancellations, changes or additions to any reservation may be
made at the above number.

SECOND AND FINAL CALL FOR PAPERS

Contributed papers and posters are now being solicited
for presentation at the annual meeting. Abstracts are
required of all persons seeking to present a paper or poster.
Use the attached form for this purpose. Abstracts must be
typewritten, double-spaced and not to exceed 200 words in
length. They must be submitted no later than December 30,
1991. All abstracts accepted for presentation will be
printed and distributed at the meeting. Those presenting
talks or posters will receive further instruction on
preparation guidelines once their abstract is accepted.

All presentations will be evaluated by a panel of judges
and considered for recognition. Papers will be judged in
three categories: Best Professional Paper, Best Student
Paper, and Best Poster. All evaluations will be kept
confidential.

OF SPECIFIC GUIDELINES. THE PROGRAM SHALL BE THE RESPONSIBILITY OF THE PROGRAM COMMITTEE.

SECTION 4. OFFICERS

THE OFFICERS OF THE CHAPTER SHALL CONSIST OF A PRESIDENT, PRESIDENT-ELECT, SECRETARY-TREASURER, AND SECRETARY-TREASURER-ELECT.

THE PRESIDENT-ELECT AND THE SECRETARY-TREASURER-ELECT SHALL BE ELECTED AT THE ANNUAL MEETING. THE SECRETARY-TREASURER SHALL HOLD OFFICE FOR TWO YEARS, BUT THE TERM OF THE OTHER OFFICERS SHALL BE ONE YEAR. THE SECRETARY-TREASURER-ELECT SHALL BE ELECTED IN ALTERNATE YEARS. IN CASE OF A VACATED POSITION, THE EXECUTIVE COMMITTEE SHALL APPOINT A QUALIFIED REPLACEMENT TO FILL AN UNEXPIRED TERM. THE INCUMBENT (NOT NEWLY ELECTED) PRESIDENT-ELECT AND SECRETARY-TREASURER-ELECT SHALL SUCCEED TO THE OFFICE OF PRESIDENT AND SECRETARY-TREASURER, RESPECTIVELY AT THE EXPIRATION OF THE TERMS OF THOSE OFFICERS.

IN THE EVENT OF A CANCELLATION OF AN ANNUAL MEETING AT WHICH ELECTION OF OFFICERS WAS SCHEDULED, THE OFFICERS AND THE MEMBERS OF ANY COMMITTEE SHALL CONTINUE TO SERVE UNTIL THE NEXT SCHEDULED MEETING.

SECTION 5. DUTIES OF OFFICERS

THE PRESIDENT OF THE CHAPTER SHALL PRESIDE AT ALL MEETINGS, SERVE AS CHAIRPERSON AT THE EXECUTIVE COMMITTEE, REPRESENT THE CHAPTER ON THE NORTHEAST DIVISION EXECUTIVE COMMITTEE AND IN THE AMERICAN FISHERIES SOCIETY, MAKE APPOINTMENTS AND PERFORM OTHER DUTIES AND FUNCTIONS AS ARE AUTHORIZED AND NECESSARY. THE CHAPTER SHALL REIMBURSE THE PRESIDENT OF THE CHAPTER, OR AN ALTERNATE DESIGNATED BY THE PRESIDENT, FOR BUDGETED EXPENSES ASSOCIATED WITH ATTENDANCE AT THE EXECUTIVE COMMITTEE MEETINGS HELD DURING THE ANNUAL AMERICAN FISHERIES SOCIETY MEETING, AND THE EXECUTIVE COMMITTEE MEETINGS OF THE NORTHEAST DIVISION. A BUDGET FOR THESE EXPENSES SHALL BE PROPOSED BY THE CHAPTER PRESIDENT AND APPROVED BY THE CHAPTER EXECUTIVE COMMITTEE.

THE PRESIDENT-ELECT SHALL BE CHAIRPERSON OF THE MEMBERSHIP COMMITTEE AND MEMBER OF THE PROGRAM COMMITTEE, AND SHALL ASSUME THE DUTIES OF THE PRESIDENT IF THE LATTER IS UNABLE TO ACT.

THE SECRETARY-TREASURER SHALL KEEP THE OFFICIAL RECORDS OF THE CHAPTER, SUBMIT A COPY OF THE MINUTES OF THE ANNUAL BUSINESS MEETING TO THE EXECUTIVE DIRECTOR OF THE SOCIETY AND THE SECRETARY-TREASURER OF THE NORTHEASTERN DIVISION WITHIN 30 DAYS AFTER SAID MEETING; AND COLLECT AND BE CUSTODIAN OF CHAPTER FUNDS, DISBURSE FUNDS AS AUTHORIZED BY THE EXECUTIVE COMMITTEE OR MEMBERSHIP, SUBMIT A RECORD OF RECEIPTS AND

DISBURSEMENTS AT THE ANNUAL MEETING, AND PERFORM SUCH DUTIES AS MAY BE REQUESTED BY THE EXECUTIVE DIRECTOR OF THE AMERICAN FISHERIES SOCIETY AND OFFICERS OF THE NORTHEASTERN DIVISION.

THE SECRETARY-TREASURER-ELECT SHALL AID THE SECRETARY-TREASURER IN HIS/HER DUTIES AND ACT AT THE DIRECTION OF THE SECRETARY-TREASURER AND PRESIDENT.

SECTION 6. EXECUTIVE COMMITTEE

THE EXECUTIVE COMMITTEE SHALL CONSIST OF THE CHAPTER OFFICERS (PRESIDENT, PRESIDENT-ELECT, SECRETARY-TREASURER, SECRETARY-TREASURER-ELECT) AND THE IMMEDIATE PAST-PRESIDENT. THE CHAIRPERSONS OF STANDING COMMITTEES AND AD HOC COMMITTEES SHALL BE NON-VOTING MEMBERS OF THE EXECUTIVE COMMITTEE. THE EXECUTIVE COMMITTEE IS AUTHORIZED TO ACT FOR THE CHAPTER BETWEEN MEETINGS AND TO PERFORM APPROPRIATE DUTIES AND FUNCTIONS.

SECTION 7. CHAPTER COMMITTEES

CHAIRPERSONS OF COMMITTEES, EXCEPT AS LISTED IN SECTIONS 5 AND 6, SHALL BE APPOINTED BY THE PRESIDENT. COMMITTEE MEMBERS SHALL BE CHOSEN BY THE RESPECTIVE COMMITTEE CHAIRPERSONS. STANDING COMMITTEES SHALL INCLUDE: AUDITING, ENVIRONMENTAL CONCERNS, MEMBERSHIP, NOMINATING, PROGRAM, AND RESOLUTIONS. THE NOMINATING COMMITTEE WILL BE CHAIRED BY THE IMMEDIATE PAST-PRESIDENT AND THE SELECTION OF NOMINEES FOR OFFICE BY THE NOMINATING COMMITTEE WILL BE DONE IN CONSULTATION WITH, AND SUBJECT TO, THE APPROVAL OF THE EXECUTIVE COMMITTEE.

THE COMMITTEES SHALL BE COMPOSED OF THE CHAIRPERSON AND ANY OTHER MEMBERS IN GOOD STANDING SELECTED BY THE CHAIRPERSON. THE COMMITTEES SHALL AID THE PRESIDENT IN THE OPERATION OF CHAPTER BUSINESS AND ACTIVITIES. THE PRESIDENT SHALL DIRECT THEM IN THEIR DUTIES. THEY MAY ALSO BE DIRECTED BY VOTE OF THE MEMBERSHIP AT AN ANNUAL MEETING.

THE TERM OF OFFICE FOR MEMBERS OF THE CHAPTER COMMITTEES SHALL END UPON THE DISCHARGE OF THE DUTIES FOR WHICH THEY WERE APPOINTED, OR AT THE NEXT ANNUAL MEETING OF THE CHAPTER, WHICHEVER COMES FIRST.

SECTION 8. VOTING AND QUORUM

DECISIONS AT MEETINGS OF THE CHAPTER SHALL BE BY A MAJORITY OF THOSE VOTING, EXCEPT THAT AMENDMENTS TO THE BYLAWS REQUIRE A 2/3 MAJORITY, AND EXCEPTED FURTHER, THE ELECTION OF HONORARY MEMBERS AND RECIPIENTS OF THE PROFESSIONAL ACHIEVEMENT AWARD REQUIRE A 2/3 MAJORITY VOTE. ANY MEMBER IN GOOD STANDING WHO CANNOT ATTEND A MEETING MAY REQUEST THE EXECUTIVE COMMITTEE IN WRITING TO REGISTER A VOTE ON A PREVIOUSLY PUBLISHED QUESTION AND SUCH A VOTE SHALL BE

RE: Committee Meeting

At our last Executive Committee meeting on March 30 we selected **Wednesday, May 27, 12:00 - 3:00 p.m.** for the next AFS EXCOM meeting. There are a number of significant issues to discuss and some challenges to meet at this meeting. These include final arrangements for the Larval Fish Workshop, support and preparation for the NE Warmwater Workshop, program development for the Annual Meeting in Owego, finalization of resolutions, snaring of new members, development of professional incentives, and a report on the Annual meeting of the Northeast Division. The meeting will be in 241 Illick, the large brick building just south of the Syracuse Dome (Exit 18 from I-81). Coffee and doughnuts will be provided; bag lunches are optional!

NEWYORK CHAPTER AMERICAN FISHERIES SOCIETY
1992 ANNUAL BUSINESS MEETING

The 1992 annual meeting of the NY chapter AFS was called to order by president Tom Field at 3:32 pm on January 31, 1992 at the Treadway Inn, Owego, NY. Fourtyeight members were in attendance.

A motion was made to dispense with the reading of the 1991 annual meeting minutes which had been sent out to the membership in the newsletter. The 1991 minutes were accepted as printed.

Presidents' Report

President Field represented the chapter at both the northeast division and national AFS meetings this year. President Field led a short discussion on possible sponsorship of the NE division warmwater workshop in 93. Particulars were differed till New Business.

Treasurers' Report

Jack Hasse reported that the books had been audited by Bob Lange and found to be in proper order. The 1991 Annual Financial Report was distributed and discussed (see attachment). As of 1/29/92 we had \$3,166.86 in an interest bearing checking account and \$13,585.15 in certificates of deposit. Receipts for the year totaled \$8,526.86 while expenses were \$8025.70. The money market account was closed and funds transfered to the interest bearing checking account.

Membership Report

Secretary Hasse reported that the current membership stands at 334. We have picked up 79 new members as a result of having the parent society collect dues. There are 129 members with up to date dues as of this meeting.

Presidential Candidates

Past-president Barb Knuth thanked the committee of Barnhart, Lange, Werner and Hasse in the search for new officers. Five potential presidential and three secretary/treasurer candidates were identified. Ed Mills and Paul McKeown were nominated for president while Tim Sinnott was the only secretary/treasurer candidate. With no nominations from the floor the polls were closed. Ed and Paul gave short speeches outlining their positions on issues of interest to the organization then ballots were issued.

Program

Bill Gordon reported no real problems for this years meeting. We had 115 registered before the business meeting.

Environmental Concerns

Gary Neuderfer reported a good response from the chapter to

the request for environmental concerns. Habitat quality held the most concern for members(study summarized in the December newsletter). Position papers will be produced on the topics of most concern.

Resolutions

Bob Werner thanked Gandino, Lange and Busch for serving on the committee with him. EXCOM acted on a resolution concerning interest generated from license receipts being impounded but before we could send it out, the Dept. of Budget withdrew its plan to impound the monies. A resolution concerning the hearing on the water diversion from Schoharie Creek for snow making purposes was presented to the membership. The hearing by an administrative law judge was stopped for non-technical reasons. Negotiations are dragging on at this time but instream flows are still reduced below the IFIM recommendations. The trout population has been impaired. The resolution was voted on and passed by the membership with copies of the resolution being sent to DEC commissioner Jorling and Gov. Cuomo(see attached resolution).

Professional Incentives

Paul McKeown announced that our nominees for the National AFS Excellence Award would be John Forney and Bill Pearce. C.L. Smith has been nominated for the Dwight Webster Award. Paul Neth was nominated and accepted as an honorary member of the chapter and Bob Engstrom Heg was nominated and accepted for the Professional Achievement Award. President Field presented a special award to Joe Gorsuch for going the "extra mile" for the chapter over the past years especially in regards to getting the newsletter printed.

Student Unit

Chris Gandino reported there are 30 active members in the student subunit. Activities of the past year were manning booths at fishing tournaments and bringing in guest lecturers. The raffle to be conducted during the evening activities was plugged. The students would like to see up to \$50 per student(with a maximum of \$300 /year) be used for students to attend the annual meeting if they are presenting a paper or poster.

Newsletter

Al Schiavone reported we must find another printer for the newsletter and will have to assume full cost of the printing. The feature article which made its debut this past year has been well recieved. As usual, there is always a need for articles.

Workshop

Neil Ringler presented an update on the larval fish workshop the chapter will be presenting. The dates of June 25,26, 1992 have been confirmed with Dr. Nancy Auer. A field

component is included in the workshop. Donations are being solicited to reduce costs. Capacity is about 30 people so if there is strong interest in this topic a repeat workshop the following year is being considered.

Past Presidents Report

Barb Knuth presented the finished revised copies of the officers handbooks. All officers and committee members will receive copies and the secretary will maintain a supply for members who need them.

Old Business

The by-laws change regarding payment for travel and attendance for the chapter president to attend the NE division and national AFS business meetings was approved by the national office.

New Business

The chapter voted to support sponsorship of the 1993 warmwater workshop with the NE division. The chapter would be responsible for the social items and on-site arrangements while the workshop committee would handle the rest of the arrangements.

No decision on having a joint NYAFS-NYTWS was reached. Most members present thought it was a good idea if arrangements could be made. Possible topics were "diversity" or "habitat contamination". There was also a short discussion on possibly holding a summer meeting with our counterparts from Canada with some sort of a Great Lakes theme. This idea will be looked at by the EXCOM.

Bob Carline had a last minute change of plans and could not attend this meeting.

A reminder that we have T shirts for sale was given by president Field.

The FDA has limited chemicals and drugs that can be used on fish destined for food production.

Barb Knuth reported the following election results. Our new officers will be Ed Mills as president-elect and Tim Sinnott as secretary/treasurer-elect.

Neil Ringler was then escorted to the podium by Lange and Werner and took over the meeting.

As his first act of office, Neil presented the past-presidents certificate to Tom Field. Tom thanked the group for their support as he moved into the past-president position.

President Ringler then presented his budget to the organization. Two of his objectives this year will be to develop ways to increase the number of females in the profession and to look into the possibility of updating the "Aquatic Biologist", the highly successful film the chapter produced a number of years ago.

The meeting was adjourned at 5:17 pm.

Respectfully submitted

John J. Hasse, Secretary

WHEREAS Upper Schoharie Creek is an important Catskill Mountain trout stream providing an estimated 16,000 hours of recreational angling annually, and

WHEREAS Upper Schoharie Creek is a stream with a classification of "C" and with a standard of "ts" according to sections 701.8 and 701.19 of Title 6 of the "Official Compilation of Codes, Rules and Regulations of the State of New York, and

WHEREAS the classification "C" is designated for water suitable for fish propagation and survival, and standard "ts" is designated for water suitable for trout spawning, and

WHEREAS water is diverted under permit from Upper Schoharie Creek for snowmaking purposes, and

WHEREAS water in excess of that permitted has been diverted from Upper Schoharie Creek, and

WHEREAS instream flow studies indicate that a minimum of 26 cfs in Upper Schoharie Creek (at Demming Road Bridge) is necessary to provide adequate aquatic habitat to maintain the integrity of the aquatic community, and

WHEREAS an environmental enforcement hearing process commenced to determine effectiveness of permit limits on the protection of the aquatic community and the impact of permit restrictions on snowmaking operations, and

WHEREAS this hearing process has been suspended leading natural resource constituencies to question the resolve of the Department of Environmental Conservation to fulfill its responsibility to protect natural resources,

THEREFORE be it resolved that the New York Chapter of the American Fisheries Society petitions the New York State Department of Environmental Conservation to reinstitute the hearing process regarding water diversion from Upper Schoharie Creek and further be it resolved that full weight be given to the protection of the integrity of the aquatic ecosystem when determining best use of water.

NEW YORK CHAPTER AFS EXCOM MEETING
JANUARY 30, 1992

The meeting was called to order at 7:15 pm by president Field at the Treadway Inn Owego, NY. Members present were Tom Field, Jack Hasse, Barb Knuth, Neil Ringler, Dan Josephson, Al Schiavone, Gary Neuderfer, and Paul McKeown.

Minutes from the previous EXCOM meeting were approved.

Presidents Report

A position paper prepared for the chapter by John Schacte was discussed. Fish inspection fees that are required by private aquaculturists are very high. The north eastern US is the only area that the feds do not provide this service. It was decided that EXCOM would discuss the situation with John Nickum before taking any further action. A copy of the position paper is attached to these minutes. AFS sent us a copy of a letter they recieved from the governor of Maryland asking for support in saving the aquatic resources of the Chesapeake Bay watershed.

Secretary/Treasurers Report

The 1991 annual treasurers report was circulated and discussed. We closed out the money market account and closed the checking account while opening an interest bearing checking account. We have stopped losing money and posted a several hundred dollar gain for the year. We recieved the first check for dues collected by AFS. Several problems have shown up as a result of the collection from AFS. We are losing information for the directory on employer, phones, and interests. Some members are double paying. The honorary members are also paying. Tom Field will contact AFS and advise them of our honorary status. Rebates will be sent all members who double paid their 92 dues.

President Elects Report

The larval workshop scheduled for June 25,26, 1992 is proceeding on schedule. It has been advertized in Fisheries and the chapter newsletter. The lab site will be in Illick Hall at SUNY ESF Syracuse. Field work will take place on Onondaga Lake. \$350 for a chicken barbeque has been donated. A size limit of 30 people has been set. If there is enough interest we will hold a repeat workshop next year. Neil then went over his proposed 1992 budget. The dues estimate was to high. It was reduced from \$5600 to \$2800.

Past Presidents Report

Barb reported that the chapter handbook has been revised and printed and will be distributed at this meeting.

Student Subunit Report

Neil reported for Chris Gandino who was taking a final exam.

**NEW YORK STATE CHAPTER
AMERICAN FISHERIES SOCIETY**

During the past ten years a significant expansion in aquaculture has occurred in New York state. Concurrently an increase in movement of live fish products across jurisdictional boundaries in our region has occurred. Various natural resource agencies have responded accordingly to concerns of potential introduction of exotic fish species and fish disease organisms. Increasingly restrictive fish importation regulations have been promulgated to control fish movement. In order to comply with such regulations, private aquaculture has sought and obtained fish health inspection services from various sources to include the USFWS. In recent years, for various reasons including fiscal constraints, the USFWS has withdrawn this service in the Northeastern U.S. while continuing such service in other regions of the country. An exception to this policy has occurred where a few private facilities have met certain conditions for fish health inspection by the regional Fish Health Center at Lamar, PA. However at present, a private inspection for fee service is generally the sole option for private aquaculture in NYS as well as most of the Northeastern U.S. For many new aquaculture operations, with as yet limited markets, this service is cost prohibitive, and even more importantly difficult to obtain in a timely fashion. Such delay has had a negative impact on potential sales for some aquaculturalist's. Consequently, the present option for compliance with various agency's fish import regulations presents a serious impediment to continued

TO: Tom Fields, President, NYC AFS
FROM: Gary N. Neuderfer, Chairperson, NYC ECC *Gary Neuderfer*
SUBJECT: 1991 Environmental Concerns Comm. Report
DATE: January 30, 1992

My committee's 1991 accomplishments were somewhat disappointing to me personally, and I take full responsibility. However, if Neil Ringler is willing, I would accept this job for 1992. I think the Committee is poised for a fruitful year, and I would like to carry that through.

The Committee carried through on last year's idea of a questionnaire to determine what members thought were New York's most pressing environmental problems. The responses were summarized and published in the Chapter Newsletter. That summary has been the basis for a proposed Action Agenda for 1992. It proposes writing 6 to 10 Position Papers on issues members noted were serious environmental concerns. I hope to get EXCOM and membership feedback at the upcoming annual meeting in Owego.

John Schachte drafted a position paper for EXCOM consideration on the issue of providing fish health diagnostic services to the private NE aquaculture community. That letter is pending before the EXCOM.

There was correspondence with the NE Division, Ad Hoc Committee on Environmental and Resources Issues. We outlined the NYC ECC's mission, and supported the idea of a standing Environmental Concerns Committee at the NE Division level. This would help us deal with regional issues, such as acid precipitation and global climatic change.

Several issues that we missed comment deadlines on for various reasons are listed here:

- A report entitled *Now and for the Future: A Vision for New York's Coast* came to the Committee via the national AFS Office.
- The Army Corp Engineers Nationwide Permit Program.
- The Large Rivers Research and Restoration Act. The bill received sponsorship, and I talked to Ray Hubley regarding actions the NYC could take to support this bill. He said he would request support from the Chapter, Divisions, etc. when the bill was introduced to committee. I never heard from him, and I am unaware of the status of this bill at this time.

EXCOM Meeting Minutes, 30 March 1992

The meeting was called to order at 12:10 PM. Members present were Neil Ringler, Tom Field, Ed Mills, Don Stewart, Bob Werner, Al Schiavone and Tim Sinnott. Minutes of the annual business meeting and the January 30 EXCOM meeting were distributed, and the treasurer's report was read. Don Stewart asked how the interest from the CD accounts was used. Tom Field indicated that it was usually used to defray expenses from the annual meeting.

Newsletter

Al Schiavone reported that the newsletter was slightly behind schedule. He was waiting for the business meeting minutes, and if material from ESF was in. The newsletter should be sent to Jack Hasse next week (6-10 April). It would be mostly the minutes from the annual meeting. The feature article for the next newsletter would be "1991 Status of Lake Trout Rehabilitation in Lake Ontario" - a collaboration by USFWS, Ontario MNR, and NYDEC.

Professional Initiatives

Tom Field reported that John Forney was a finalist for the AFS Excellence Award. Nominations for the award must be prepared about a year in advance, submitted by early March.

Resolutions Committee

Tom Field raised a fish health issue concerning the issuance of fish health certificates by the U.S. Fish and Wildlife Service. John Schachte prepared a draft resolution and Paul Bower requested that the chapter approve the resolution which calls for the USFWS to expand its fish health service. Presently producers in the northeast must continue to use a single private source of fish health certification that charges about \$950 for the service. EXCOM approved the resolution and identified a list of names that the resolution should be sent to. A copy of the draft is attached.

Student Sub-chapter

Neil Ringler reported on the student sub-chapter. The sub-chapter has a new staff. President is Margaret Pike, Vice President is Brian Jonckhefre, Secretary/Treasurer is Eric Fickbohn. The sub-chapter has about 25 active members. Next activity is a trip to the Allegheny National Park. Student activities were summarized in the NE newsletter. The student sub-chapter plans to offer \$50 travel stipends for students travelling to the National AFS meeting to present papers. They are developing a process for selecting recipients.

Nominating Committee

Tom Field reported that the nominating committee is "quiescent" for now. He will put together a group of ex-presidents to select a slate for next year. He also reported on evaluations requested by the parent society. Evaluations were requested on how AFS long range plans are done, and on the proposed USFWS budget.

Audit and Finance committee
Assigned to Bob Lange

Membership Committee

Ed Mills would like to double the active membership. Needs ideas to accomplish this. Needs to obtain the AFS National membership lists for New York and Ontario. Newsletter should be sent one time to prospective new members.

Miscellaneous

Barbara Knuth applied to be a member of DEC's Return a Gift to Wildlife Committee. A favorable letter for her candidacy was received from Herb Doig. She is waiting for the formal assignment to the committee to be made.

Larval Fish Workshop

The Larval Fish Workshop is proceeding as planned. It will take place on 25-26 June. Checks from 11 participants have been received, and 12 more have requested information. Of the 12, eight will probably attend. There is a good mix of attendees; USFWS, academics, consultants, etc. Arrangements are proceeding well. Attendees are eligible for continuing education credit (CEC), either graduate or undergraduate.

The NE AFS Division would like to hold a workshop in New York. Dave Green is the chairman of the NE committee in charge of the workshop. The topic will be black bass management. Past NE Division workshops have had an average attendance of about 150. The issue of how to share the expenses and proceeds was discussed. Dave Green was called, and the discussion was deferred until after Dave arrived. Dave then explained that only very preliminary planning had taken place, and the year for the workshop had not even been determined. The EXCOM decided to support the idea of hosting a NE Division workshop in New York.

1993 Annual Meeting. The remainder of the meeting focused on the plans for the 1993 annual meeting. It was decided that the meeting would be held in Owego again, and the dates would be 29-30 January 1993. This date may conflict with a meeting of the Great Lakes Consortium, so they should be notified. Al Peterson is willing to handle the arrangements if the meeting was held in Owego. The theme was discussed and tentatively agreed upon as: Large Lake Ecosystems: Rehabilitation and Sustainability. Suggestions for possible invited speakers were also discussed.

The meeting was adjourned at 3:39 PM. The date for the next EXCOM meeting was tentatively set for 27 May 1992 at ESF.

Respectfully submitted

Timothy J. Sinnott
Secretary

RE: Committee Meeting

Thank you for agreeing to meet in Syracuse on Monday, March 30, 12:00-3:00 p.m. We will provide coffee and possibly donuts, but feel free to forage on bag lunches as desired. The meeting will be in Room 241 Illick Hall, the large brick building just south of the Syracuse Dome (Exit 18 from I-81). We look forward to hearing from the various committees, and especially to developing the major themes and groundwork for the 1993 program in Owego.

DRAFT (3/24/92)
NEW YORK STATE CHAPTER
AMERICAN FISHERIES SOCIETY

During the past ten years a significant expansion in aquaculture has occurred in New York State. Concurrently and increase in movement of live fish products across jurisdictional boundaries in our region has occurred. Various natural resource agencies have responded accordingly to concerns of potential introduction of non-indigenous fish species and fish disease organisms. Increasingly restrictive fish importation regulations have been promulgated to control fish and pathogen movement. In order to comply with such regulations, private aquaculture has sought and obtained fish health inspection services from various sources including the USFWS. In recent years, for various reasons including fiscal constraints, the USFWS has withdrawn this service in the northeastern United States while continuing such service in other regions of the country. An exception to this policy has occurred where a few private facilities have met certain conditions for fish health inspections by the USFWS Regional Fish Health Center at Lamar, PA. However at present, a private inspection for fee service located in Maine is generally the sole option for private aquaculture in New York State as well as most of the northeastern United States. For many new aquaculture operations, with as yet limited markets, this service is cost prohibitive, and even more importantly difficult to obtain in a timely fashion. Such delay has had a negative impact on sales for some aquaculturists. Consequently, the present option for compliance with the variety of fish importation regulations presents a serious impediment to continued aquaculture development in our state as well as the continued operation of existing private aquaculture facilities.

In September 1990, the attendees of Aquaculture Summit I in Las Vegas acknowledged that the absence of affordable and timely fish health inspection services was one of several major impediments nationwide to continued aquaculture growth. Subsequent nationally represented conferences, recent proposals and legislative actions seek to establish permanent national solution to this problem. Accordingly we recognize that national initiatives are likely to provide the most effective permanent solution to this difficult problem. However, in the interim the producers in the northeast must continue to utilize the sole private service available. Therefore the NYS Chapter of AFS feels it is appropriate to petition the USFWS to expand it's inspection services both in NYS and the northeast, at least to the extent that it is available in other regions of the United States and that such service remain available until a permanent national strategy for fish health inspection is adopted.

DRAFT

Accepted

NEW YORK CHAPTER — AMERICAN FISHERIES SOCIETY

EXCOM Meeting Minutes, 27 May 1992

The meeting was called to order at 12:17 PM. Minutes of the 30 March meeting were read and accepted with minor corrections. The members present were: Neil Ringler, Bob Werner, Don Stewart, Jack Hasse, Tim Sinnott, Bob Lange, Gary Neuderfer.

Past Presidents's Report

The past president's report was submitted by Bob Werner in Tom Field's absence. A nominating committee was formed consisting of Jim Haynes, Bob Lange, Joe Gorsuch, and Tom Field. They would produce a slate of candidates for the January 1993 annual meeting.

Treasurer's report

Jack Hasse submitted the treasurer's report. Additionally, he noted that the CD's would expire in August and April. As they expired they would be turned over to Tim Sinnott. The current membership as 356, and about 45% was paying through National.

Newsletter

No Report

Student Chapter

Student in the field, no separate report

Environmental Concerns Committee

Neil Ringler presented a letter about the need to lobby congress for sea lamprey funding. A discussion then ensued as to whether or not the chapter should actively be involved in lobbying. The point was made that state employees must be careful to differentiate between lobbying as an AFS member and as a state employee. It is possible that the chapter as a whole may disagree with the issue of supporting funding for sea lamprey control. The question was asked as to whether it should be handled as an Environmental Concern or as a Resolution. Bob Lange provided some additional information on the subject. There was a goal of reducing TFM usage by 50% by the year 2000. Funding was needed for research to explore alternatives to TFM. The EXCOM voted to authorize Neil to write a letter in support of increased funding for sea lamprey control.

Preseident's Report

Neil Ringler reported on the Northeastern Division EXCOM meeting held in Norfolk Virginia. A resolution was passed at that meeting to provide ten \$100 travel awards for students. The Northeast Division also wants to bring down the registration fee. The papers presented were of good quality, but the number of attendees was down. The Northeast meeting presents a good opportunity to get students involved with marine issues. An excellent talk on the advocacy role of AFS and its chapters was held. Neil also received feedback at the meeting that the New York Chapter was held in high regard by the Northeast division.

Warmwater Workshop Report

Al Schiavone signed a contract with Bonnie Castle as the location for the Northeat Division Warmwater Workshop. The workshop will be held in October 1993. The New York

Neal Rager

Dr. Barbara Knuth
 President
 New York Chapter
 American Fisheries Society
 114 Fernow Hall, Cornell University
 Ithaca, NY 14853

Dear Dr. Knuth:

Because we have corresponded in the past about federal funding for the sea lamprey control, I wanted to update you on the funding picture for this year and enlist your support.

Last year the Congress appropriated \$7.78 million to the Great Lakes Fisheries Commission (GLFC) for sea lamprey control. I'm proud of that figure - it's a \$1.48 million increase over funding for the previous year and a \$1.08 million increase over the Administration's request. Last year was the year we moved sea lamprey funding to a higher level of visibility, and already we are seeing the benefits.

President Bush's budget request this year for the GLFC is \$8.758 million. This total - far larger than any previous request - is a direct result of our efforts last year. While this is an excellent start, those of us who support lamprey control believe that \$12.3 million is a more accurate requirement in Fiscal Year 93. Thus we have collectively set a goal of \$12.3 million and have begun the effort to seek it.

The key decision-makers on this matter are the members of the House Appropriations Committee's Subcommittee on Commerce, Justice, State and Judiciary. The Chairman of the Subcommittee is Rep. Neal Smith of Iowa. Other Members include Rep. Bill Alexander (Arkansas), Rep. Joe Early (Massachusetts), Rep. Bob Carr (Michigan), Rep. Alan Mollohan (West Virginia), Rep. Nancy Pelosi (California), Rep. Harold Rogers (Kentucky), Rep. Ralph Regula (Ohio), and Rep. Jim Kolbe (Arizona). They all can be reached at this address: House Office Building, Washington, DC 20515.

I urge you to write these leaders and urge them to support \$12.3 million for the Fisheries Commission. I don't need to give you the many critical arguments in favor of increased funding. Rather you should put in your own words the importance of federal efforts to control and eradicate these creatures. I believe your letter would be most effective if it explained how lamprey control effects you and your organization. If it is not inconvenient, please send me a copy of your letter for our files. In addition, if you know others who would be willing to weigh-in on this matter, please encourage them to do so.

It is very important that we act on this within May as the Subcommittee will begin its deliberations in June. We must act now or suffer the consequences of reduced funding in FY 1993.

Please feel free to contact me if you have any further questions.

Sincerely,

ROBERT W. DAVIS
Ranking Minority Member
Committee on Merchant Marine
and Fisheries

RWD:mrđ

P.S. Time is of the essence. We need you to contact these legislators immediately!

NEW YORK CHAPTER — AMERICAN FISHERIES SOCIETY

March 5, 1992

Mr. Neil Ringler
President NYCAFS
19 Gettman Drive
Baldwinsville, New York 13027

Dear Neil:

Tom Field recently notified all Honorary Members of the possibility of payment of dues for the chapter if they paid dues through the parent society. A check of the records showed that Steve Gloss, Bill Pearce and Gaylord Rough have not paid dues through AFS. Paul Neth and John Forney did pay and they were issued refund checks on March 5, 1992. Joe Gorsuch also paid but took his refund in the form of a chapter T shirt at the annual meeting.

Sincerely,

John J. Hasse
Secretary/Treasurer

The New York Chapter's annual meeting in January focused on the theme of "Impacts of Aquaculture on Fisheries Management and Policy". Invited speakers addressed impacts on commercial and recreational fisheries, the role of aquaculture in wilderness areas and management, and the impacts of genetically engineered stocks on fishery resources. The meeting also included two contributed paper sessions. Neil Ringler was installed as President of the chapter, replacing Tom Field who assumed the Past-president duties from Barbara Knuth. Ed Mills is the new President-elect, and Tim Sinnott, as Secretary-Treasurer-elect, will replace Jack Hasse. The Chapter approved an action agenda for the Chapter Environmental Concerns Committee, and acted on resolutions addressing fishery habitat management at the state level. The Student Unit provided the annual banquet entertainment -- a fund-raising raffle of fishing equipment and nature art prints donated by local and national sources.

1. Long-time chapter member Joe Gorsuch (right standing) receives an appreciation award from President Tom Field for years of dedicated service to the New York Chapter.

2. New President Neil Ringler (center) is escorted to the podium to assume his duties by Past-Presidents Bob Werner (left) and Bob Lange (right).

3. New York Chapter Student Unit members Chris Gandino (right) and Brian Jeankiere conducted a raffle to entertain the crowd and raise money to support Unit activities.

NEW YORK CHAPTER AFS

TO: Tom Field
FROM: Jack Hasse

January 10, 1992

It took several phone calls to the AFS office but I think we have gotten things straightened out in regards to the missing dues and rebate money.

The rebate money is supposed to be mailed to the chapter around the end of this month. They couldn't tell me what the amount will be but it should be a few hundred dollars based on the last check.

The missing dues check was apparently due to a computer error in making up the mailing labels. As it was explained to me, the addresses got all mixed up and most of the letters came back as undeliverable. Ours must have gotten lost in the mail since it was never returned. They are stopping payment on the old check and issuing a new one.

AFS will send us a list of members who have sent in the dues money to the central office. I asked them to hold off until a week before our meeting so we have the most up to date list available and they have agreed to the request.

DATE: October 31, 1991

RE: Quarterly chapter figures

Please find enclosed a list of members who have paid dues for your Chapter for 1992 as of September 30, 1991.

Could you please let me know who needs to receive the member list. I send them out on a quarterly basis. Please have your newsletter editor call me anytime he/she needs labels.

* Your checks for dues will be mailed under separate cover.

If you have any questions or need membership materials please call me.

* Tom:

Your check is being mailed to Sci-Tues.
